Transport for NSW

Wakehurst Parkway Improvements project

Early Work Notification

May 2026

Transport for NSW acknowledges the Traditional Custodians of the Northern Beaches on which we work and pays respect to Elders past and present.

The NSW government is delivering improvements to Wakehurst Parkway between Frenchs Forest and Narrabeen focusing on safety and capacity for this key link in Sydney's Northern Beaches.

What work are we doing?

From Monday 11 May, early work will begin to establish site compounds in preparation for the main construction phase, scheduled to start in June. Work includes installing site offices, project team facilities and amenities, as well as setting up designated areas for vehicle parking, equipment, and material storage. Utility investigations will also be carried out as part of this work.

When and where we'll be working

Our main compound will be located on Wakehurst Parkway and Warringah Road and our secondary compound on Wakehurst Parkway near Dreadnaught Road. Some night work will be required to complete the work and will take place over seven nights in May.

Our standard working hours are **Monday to Friday 7am to 6pm** and **8am to 1pm on Saturday.** Our out-of-hours are from **Sunday to Thursday 8pm to 6am.** Noisy work will be completed before midnight.

Our equipment

Work will include the use of the following machinery and equipment:

- **Service vehicles** (vacuum truck)
- **Delivery & light vehicles** (over-size and light vehicles)
- **Lighting equipment** (generators and lighting towers)

What will this mean for you?

You may notice:

- Workers and vehicles moving around the compounds
- Deliveries to and from site compounds
- Traffic controllers and signage
- Workers carrying out utility investigations
- Temporary lane closures and reduced speed limits
- Noise from machinery and equipment.

Managing our impacts

We will manage our work to minimise impacts on the community and the environment by staging activities during periods of lower traffic volumes and reducing noise where possible.

We will also:

- Fence worksites for safety and security
- Use non-tonal reversing beepers
- Minimise light spill through targeted lighting
- Protect environmentally sensitive areas
- Complete oversize deliveries later at night when traffic volumes are lower
