

Upgrade and reposition existing showers with a new timber square post, double shower head and footwash (western side).

Retain existing memorial seats.

Re-orientate existing recycle bins to an east - west orientation as shown. Widen existing concrete beach access to accommodate bins.

Demolish existing concrete seat pads and install new coloured concrete (ccs Canvas) landings between new kerb and existing sea wall.

Remove existing turf and level sand build up. Replace with synthetic turf set flush with top of sea wall and new kerb edge.

Remove existing koppers logs and replace with sandstone seat logs (500 x 500 x 1000 mm with 1500 mm gap between).

Relocate 2 existing wheelie bins to edge of car park, as shown.

New flush concrete kerb edge.

Maintenance of garden beds within car park including mulching, pruning & underplanting. Install sandstone boulders at the end of garden beds to prevent trampling.

Accessible Shower: Upgrade and reposition existing shower with a new square timber post, double shower head & footwash (western side). Flush access from car park.
