

RAGLAN STREET ENTRANCE

The existing entry is to be enhanced with the demolition of the existing ticket turnstile structure, removal of shrub planting to create an open and inviting forecourt. New accessible and unisex toilets are to be constructed within the greenkeepers store area. Emergency vehicle and pedestrian access to the oval is to be improved. A new roller door entry from Raglan Street to the main green keepers shed, with new soil store is proposed. Refurbishment of the green keepers building including facade treatment could incorporate a rooftop platform for score keepers and or TV camera location.

The footpath on Raglan Street is to be widened with the removal of a fence and lowering of site levels. New granite paving to match Belgrave Street is to be installed and extend into the park with new seating benches for spectators.
